ChefWave HD™

High Pressure Microwave
Deep Fryer (small model)

Chef Wave HD™ is the world's first high pressure deep fryer that uses microwaves as a heat source. This unique piece of appliance combines several high yielding cooking technologies that interact in a completely novel way to utilize the viscosity of very hot oil, the enhancing physical properties of high pressure, and the deeply penetrating rays of microwaves. A world's first that lowers the required time to fry poultry by two thirds! That's one minute instead of three for a whole batch of chicken wings. The reduced exposure to oil lowers the fat content of the fried goods by an order of magnitude while keeping the savory goodness alive. Now also available as a small model for space-constrained kitchens.

Key Features

- Groundbreaking technology
- Advanced safety through highly durable pressure seal
- Automatic oil filter monitoring
- Easily cleanable, even in the rear
- 3 year warranty

Technical Specifications

Color	Stainless Steel
Form Factor	Small
Width	600 mm
Depth	600 mm
Height	935 mm
Weight	331 lbs
Total Power Ratings	2.2kW
Capacity	3 liters
W x D x H	600 x 600 x 935 mm
